As we face uncharted waters in a global pandemic, Kingman County K-State Research and Extension is here to help navigate how to slow the spread of COVID-19, while still producing the global food supply.

**Tips for Day to Day Operations**

- Stay at home if you have symptoms of COVID-19!
  - Notify your employer if someone in your household is sick.
- Wash hands for 20 seconds with soap and water
  - Use hand sanitizer if hand washing facilities are not available.
- Utilize Social Distancing
  - Employee meetings, chute side, filling tanks, filling bins, etc.
  - Eat meals at work by yourself (or with social distancing)
  - Individuals need to remain 6 feet apart as much as possible
- Sanitize/ Disinfect equipment and tools often
  - Keep sanitizing and disinfectant readily available in all vehicles/ equipment including hand sanitizer, disinfectant wipes or sprays, etc.
  - Reduce the number of touch contacts on equipment or commonly used items between employees.
  - Tractors, feed trucks/wagons, forklifts, ATVs, UTVs, seats, seat belts, knobs, doors, handles, buttons, refrigerators, coolers, shop tools, vaccine guns, calf pullers, etc.

**Agricultural Products and COVID-19**

There has been no evidence that COVID-19 spreads through food products or packaging. A recall does not have to be issued if a worker does test positive with COVID-19 that has been in contact with the food product or livestock.
